

# PDF Document 1

Welcome to the PDF Processing Skill!

This is the content of the first PDF file.

Key Features:

- Created using ReportLab library
- Formatted text with paragraphs
- Easy to merge with other PDFs

Next, we will create a second PDF file,  
then merge them together.

PDF (Portable Document Format) is a  
cross-platform file format that maintains  
consistent display across various devices.

The ReportLab library is a powerful Python  
tool for creating PDFs programmatically.
